

# Liposculpture In Lower Leg Aesthetics Surgery

## Dr. Erh-Kang Chou 周爾康

Fat sculpture of lower extremities has always accounted for a considerable proportion of the domestic liposuction body sculpture market. In Taiwan, there are not a few liposuction patients who care about the thickness of their thighs. In recent years, calf fat carving surgery has gradually become popular. With ultrasonic assistant liposuction and power assistant liposuction equipment, liposuction and sculpting of superficial calf fat become easier. The amount of liposuction is greatly increased and the swelling recovery period is also greatly shortened. This publication will fully share the perspective of appreciating calf aesthetics, tools and methods of sculpture, surgical videos and clinical cases. This publication will focus on the discussion of the calf aesthetics, the tools and methods of sculpture, and clinical cases.
